PROFESSIONAL SUMMARY

Artificial Intelligence and Machine Learning undergraduate with a CGPA of 8.5, passionate about developing intelligent software solutions using Machine Learning, Deep Learning, and Computer Vision. Strong foundation in Python, Data Structures and Algorithms, SQL, and ML frameworks. Experienced in building academic AI projects focused on computer vision and intelligent systems. Continuously improving technical and problem-solving skills through coding practice, certifications, and hackathons. Seeking opportunities as an AI/ML Engineer or Software Developer to contribute to innovative, real-world solutions.

EDUCATION

Bachelor of Engineering (B.E.) — Artificial Intelligence & Machine Learning

Sri Krishna Institute of Technology (SKIT), Bengaluru

Graduation Year: 2027 CGPA: 8.5 / 10

Pre-University Course (PUC) — Vivekananda PU College

Graduated: 2023 Score: 89%

Schooling — Gnanodhaya International School

Graduated: 2021 Score: 95%

WORK EXPERIENCE

Technical Content Specialist Intern — Incredible Minds

- Create technical content on software development and AI/ML concepts, strengthening technical communication and translating complex AI concepts into clear, accessible content.

Government Teacher Intern — Social Service Initiative

- Worked with students and assisted in educational activities as part of a government-led social service initiative.
- Developed strong communication, leadership, patience, and teamwork skills through a non-technical role that supported personal and professional growth.

TECHNICAL SKILLS

Programming Languages: Python, SQL, C/C++, Java

Core Computer Science: Data Structures & Algorithms, OOP, Problem Solving

Machine Learning: Supervised & Unsupervised Learning, Model Evaluation, Feature Engineering, Data Preprocessing

Python Libraries: NumPy, Pandas, Matplotlib, Scikit-learn

Tools & Platforms: Git, GitHub, MongoDB, Google Colab

ACADEMIC PROJECTS

Accident-Prone Zone Detection and Road Risk Analysis Using Machine Learning and Satellite Imagery

- Designed an AI-powered vehicle accident detection system using Machine Learning and Computer Vision concepts.
- Focused on accident analysis, road condition analysis, and intelligent traffic management.
- Developed project architecture, workflow, and technical documentation.

Traffic Sign Recognition Using Computer Vision

- Developed a traffic sign recognition system using image processing and machine learning techniques.
- Applied preprocessing and image classification methods to improve recognition accuracy.

DeepFake Detection

- Built a deep learning-based system for detecting AI-generated images.
- Explored TensorFlow, Keras, CNN architectures, and large-scale image datasets.

CERTIFICATIONS

SAP — Industry 4.0 • InternFort — Artificial Intelligence • InternFort — Web Development • Infosys — Machine Learning

HACKATHONS

Participated in SKIT Hackathon • Currently participating in the ISRO Hackathon

SOFT SKILLS & LANGUAGES

Soft Skills

Problem Solving, Analytical Thinking, Team Collaboration, Quick Learning, Adaptability, Communication, Continuous Learning

Languages

Kannada — Fluent

- Hindi, English — Working Proficiency
- Telugu — Listening Comprehension
